

Press release

Sogeti France assists ONERA with the Management of its information Infrastructure

Paris, September 7 2016 - Sogeti France, a wholly-owned subsidiary of Capgemini Group, is managing an infrastructure outsourcing contract with ONERA¹, the leading aeronautics and space research organisation in France, and assisting in the modernisation and security of its information systems. The four-year project, with the possibility of extending it for one year, is worth close to 10 million euros.

ONERA meets the challenges of innovation, quality, competitiveness and security in the aerospace industry, bringing its expertise to agencies, governments and industry, from large corporates to small and medium-sized businesses. Its scientific strategic plan for the period 2015-2025 places particular emphasis on the quality and high performance of its computing platforms in order to adapt to the profound changes in the world of research and the increasingly digital and global aerospace industry. The state-of-the art research conducted by ONERA requires robust and very high quality information systems.

Assisting ONERA for over 15 years on some of its sites, Sogeti now manages all the infrastructure outsourcing for² its eight national sites, offering a high-level service adapted to ONERA's business, geographical and technical challenges. This organisation is focused on the synergy and sharing of knowledge within the ISD³.

Sogeti is in charge of all the infrastructure technologies of the 4,500 work stations, 230 servers and computing stations, as well as scientific and technical applications. The contract also covers infrastructure transformation: user services, operational maintenance, supervision, operation and integration of new services.

Choosing just one company to manage its infrastructure outsourcing ensures ONERA greater control of its information systems which is part of a drive to improve its security levels.

¹ The French Aerospace Lab ONERA operates under the authority of France's Ministry of Defence

² It is one of the five areas of activity of Infrastructure France offered by Sogeti and Capgemini: the "Data Services & Application Operations".

³ ISD : Information Systems Department

About ONERA

ONERA – the French aerospace lab

ONERA is the French national laboratory for aeronautics and space R&T, staffed by more than 2,000 people. Under the supervision of the French Ministry of Defense, ONERA has an annual budget of 207 million euros, of which more than half comes from commercial contracts. As the French expert in aerospace technologies, ONERA prepares tomorrow's defenses, meets the aerospace challenges of the future, and contributes to the competitiveness of the European aerospace industry. ONERA masters all the disciplines and technologies in its aerospace fields. All major civil and military aerospace programs in France and Europe contain "DNA" from ONERA: Ariane, Airbus, Falcon, Rafale, missiles, helicopters, engines, radars, etc
